ABOUT ME

I am a final-year BScIT student with a strong academic background and a dedication to improving my coding skills. Seeking opportunities in the field of Information Technology or related areas to apply my knowledge and continue my professional growth.

PROJECTS

- **Python Automation Script:**
Developed a simple Python script for automating tasks.
- **Basic Website Development:**
Created a basic website using HTML and CSS.
- **Weather Forecasting Website**
Created a website which forecasts the weather of any location written in textbox
- **ChatBot**
Created a mobile chat app using MIT App Inventor, integrating ChatGPT API for real-time question answering. Designed user interface for smooth interaction and integrated ChatGPT for natural language processing and response generation.

INTERESTS

- Learning about new technology
- Studying and practicing coding
- Participating in IT-related activities and community service
